Data science professional with experience in public sector data collection, wrangling, and analysis. Passionate about utilizing complex data to serve communities and better their day-to-day lives. Eager to utilize data, analysis, and communication to make the world a brighter, better place.

EDUCATION

Master of Science, Willamette University <i>Willamette University</i>	Expected Graduation August 2026 Salem, OR
Bachelor of Science, Data Science & Computer Science <i>Willamette University Minor: Global Cultural Studies 4.0 GPA</i>	2026 Salem, OR

SKILLS

Data Engineering & Programming: Python, SQL, R, Azure Databricks, ETL/ELT Workflows, Data Modeling

Tools & Platforms: Git/GitHub, PowerShell, HTML/CSS, PowerBI, Excel

Collaboration & Reporting: SharePoint, Microsoft Teams, PowerPoint, Canva

Core Strengths: Analytical Problem-Solving, Data Quality & Validation, Technical Documentation, Stakeholder Coordination, Attention to Detail, Communication, Dependability, Organization

RELEVANT COURSEWORK

Data Science - Statistical Engineering, Data Ethics, Python for Data Science, Inferential Statistics with R, Survey Design and Sampling, Advanced Linear Regression Models, Models and Machine Learning, Data Engineering, Data Visualization

Computer Science - Software Development, App Development, Web Development, Data Structures, Analysis of Algorithms

EXPERIENCE

Performance & Analytics Intern, Port of Portland, Portland, OR (June 2025-May 2026)

- Conducted operational and program analyses on 35,000+ survey responses using Databricks SQL and Python, converting unstructured data into analysis-ready format to support leadership decision-making
- Produced clear, well-organized technical documentation in SharePoint, enabling continuity for team members and future interns across ongoing projects
- Developed PowerBI dashboards, visualizations, and reports for a wide range of stakeholders, improving confidence in operational and business decisions across departments
- Designed, deployed, and analyzed a sensory room feedback survey to inform purchasing decisions and enhance accessibility for travelers with disabilities

Operations Intern, Willamette University Office of Admissions, Salem, OR (January 2025-May 2025)

- Created and implemented database queries to manage and validate a dataset of over 15,000,000 entries, ensuring data integrity and accuracy
- Improved efficiency and accuracy of admission decisions through systematic manual verification of GPA calculations for approximately 200 applicants per cycle

Vice President of Finance, Alpha Chi Omega Beta Chi Chapter, Salem, OR (January 2024-December 2025)

- Managed a \$45,000+ annual budget for a 50+ member organization, ensuring full compliance with national policies and financial requirements through continuous monitoring, variance analysis, and corrective action
- Created data-driven educational materials on organizational finances, improving member understanding of budget allocation and fiscal responsibility

PROJECTS

Metro Transit Data Pipeline & Analytics May 2026-Present (In Progress)
Academic Project, Willamette University

- Designing and implementing Apache Airflow DAGs to orchestrate ingestion of simulated Prague Metro transit data from multiple heterogeneous sources (including a REST API, a PostgreSQL database, a NoSQL database, and a Graph database) into a centralized data lake
- Building dbt models to transform and structure data lake data into a data warehouse, enabling analysis of business questions related to ridership, operations, and performance
- Architecting an end-to-end ELT pipeline to support scalable, reproducible business intelligence reporting
